

Metrics

The total number of publications in which I have contributed is 92, including 87 articles published in peer-reviewed journals and 5 contributions on specialized platforms. These works are distributed across 48 different journals. According to Scopus, I have collaborated with 109 co-authors.

The citation count varies depending on the database: 1,024 in Google Scholar, 789 in Scopus, and 848 in ResearchGate. This discrepancy is naturally reflected in the H-index, which is 15 in Google Scholar, and 14 in both Scopus and ResearchGate.

A large majority of my publications (approximately 85%) have appeared in journals with an Impact Factor. The mean Impact Factor, calculated as the sum of current IFs divided by the total number of publications, is 2.0. When considering only impact-factor journals, this average increases to 2.51.

A comparative indicator provided by ResearchGate is the *Research Interest Score*, which currently stands at 361.6—placing me above 84% of ResearchGate members.
